

Aim

The Trust's objective is to achieve long-term capital growth by investing principally in the equity securities of quoted technology companies on a worldwide basis with the aim of achieving long-term capital growth.

Risks & Features

Investment trusts are quoted companies listed on the London Stock Exchange. Their share prices are determined by factors including the balance of supply and demand in the market, which means that the shares may trade below (at a discount to) or above (at a premium to) the underlying net asset value.

Competition among technology companies may result in aggressive pricing of their products and services, which may affect the profitability of the companies in which the Trust invests. In addition, because of the rapid pace of technological development, products or services developed by these companies may become rapidly obsolete or have relatively short product cycles. This may have the effect of making the Trust's returns more volatile than the returns of a fund that does not invest in similarly related companies.

Investment trusts can enhance returns through gearing. This can boost a Trust's returns when investments perform well, though losses can be magnified when investments lose value. This Trust does not currently employ gearing. Derivatives are used to manage the Trust efficiently.

History

The Trust was launched in December 1995 as a way for investors to gain exposure to quoted technology companies on a worldwide basis with the aim of achieving long-term capital growth. The Board appointed RCM to manage the trust's assets from April 2007. The decision was based on the performance of RCM's US-based technology team, their experience and RCM's depth of expertise in the management of investment trusts.

Fund Manager's Review

Walter Price

The Trust's NAV was down 1.2% for the month, underperforming its benchmark, the DJTM W. Tech \$ TR (€), which declined 0.7% during the period. May was a period of growing fear of a double dip in the economy and as a result, many technology stocks declined in that period. Detractors from performance include many of our Chinese holdings such as Longtop Financial, Sina, Baidu, and Netease.com, where concerns about accounting issues and further government tightening pressured returns. However, the portfolio owned several stocks that had been weaker earlier in the year but where results and

commentary in their earnings announcements was better than feared. Holdings such as Netflix, Citrix, Riverbed, and Salesforce.com are examples of stocks that rose during this period because of this reason. As the month began, we had one of our holdings, Sunpower, benefit from a partial tender offer by an acquirer. On the other hand, we worry that expectations for many companies may have grown too high. As a result, we have continued to prune our portfolio of stocks where we think expectations are unrealistic. Going forward, we will be sensitive to valuation and market expectations. We are also concerned about inflation and government spending cuts, but are hopeful that these fears will be resolved in a positive way.

The market seems to have entered a period of de-risking portfolios, which is not uncommon during the summer months. In our view, the world economy is not as strong as forecast and that spending expectations need to be lowered as a result of the budget challenges most governments face, the negative tax on consumers from a high oil price, and the attempt by the Chinese government to reduce the growth of inflation by rationing credit. At the same time, we believe valuations are not too high, and that many of the secular changes in technology are just getting started.

How to Invest?

The Trust is a UK public limited company traded openly on the stock market. You can purchase shares through a stock broker.

RIC: RTT SEDOL: 0339072 ISIN: GB0003390720

Shares in the Trust can be held within an ISA and/or savings scheme and a number of providers offer this facility. A list of suppliers is available on our website www.rcm.com/investmenttrusts or from the AIC at www.theaic.co.uk

Please note: Our Investment Trust Savings Plan was closed and transferred to Alliance Trust Savings on 29 February 2008. Alliance Trust can be contacted on 01382 573 737 or contact@alliancetrust.co.uk

RCM Advantage

RCM and its predecessors have been managing investment trusts since 1889, providing investors with access to investment markets around the world through professionally managed portfolios. Each trust benefits from the expertise of the RCM fund managers yet, as a company listed on the London Stock Exchange, it is independent and is overseen by its own Board of Directors.

RCM is the global equity specialist within Allianz Global Investors. With offices strategically located in the US, Europe and Asia, RCM uses its global research platform to search out investment opportunities.

Standardised past performance figures comply with the Financial Services Authority's regulations to enable investors to compare different products from different providers.

Past performance is not a reliable indicator of future performance. You should not make any assumptions on the future on the basis of performance information. The value of an investment and the income from it can fall as well as rise as a result of market fluctuations and you may not get back the amount originally invested.

RCM were appointed managers of this Trust on 30th April 2007.

Subscription Shares

Following the approval of special resolutions at an extraordinary general meeting in August 2007, 4,770,568 RCM Technology Trust Subscription Shares have been listed. Qualifying shareholders received one Subscription Share for every five Ordinary Shares held by them on 17.08.07. These are qualifying investments for stocks and shares ISAs. Each Subscription Share is capable of conversion, on notification to the Company in the thirty days preceding the annual general meeting in any of the years 2008 to 2012 (inclusive), into one Ordinary Share on the date of the relevant annual general meeting. The Conversion Price of the Subscription Shares will be 267p, which represented a 10% premium to the Net Asset Value per Share (calculated on an undiluted basis and in accordance with the basis set out in the prospectus dated 18.07.07) as at the close of business on 14.08.07.
