

Investment Rationale

From entertainment to manufacturing and from education to energy, technology has the ability to change lives on a global scale. The RCM Technology Trust connects investors to this fast-moving world. The Trust is managed by Walter Price, Managing Director and co-head of the award-winning RCM global technology team. Based in San Francisco, the team has specialist research resources which enhance its expertise in this sector. Walter Price has been analysing technology stocks for more than 35 years.

Aim

The Trust's objective is to achieve long-term capital growth by investing principally in the equity securities of quoted technology companies on a worldwide basis with the aim of achieving long-term capital growth.

History

The Trust was formed in December 1995 and re-launched by RCM in 2007 as a way for investors to gain exposure to quoted technology companies on a worldwide basis with the aim of achieving long-term capital growth. The Board appointed RCM to manage the Trust's assets from April 2007 based on the performance of RCM's US-based technology team, their experience and RCM's depth of expertise in the management of investment trusts.

Fund Manager's Review

Walter Price

Portfolio Review

The account gained 6.28% for the month, underperforming its benchmark, Dow Jones World Technology Index which gained 7.32% during the period. Stock selection was slightly positive for the month, partially offsetting negative industry allocation.

Our portfolio had several positive and negative stock impacts. On the negative side, we had positions in Nuance, Groupon, First Solar, and Sina, which all reported slightly disappointing results and whose stocks declined for the month. On an absolute basis, we were helped by a continuing positive reaction to our large holdings in Apple and Microsoft. The latter is a position that has been built up in anticipation of a strong product cycle in Windows products as companies need to replace the large installed base of XP computers before Microsoft ceases to support them in 2013. Apple, although it helped in absolute terms, was the top active detractor from the returns as we are underweight comparing to the benchmark.

In addition, we saw a nice rebound in some of our cloud computing holdings which have been under pressure for several months, as Salesforce.com had an excellent quarter with very strong cash flow and order growth, and this lifted its stock as well as that of Rackspace, Netsuite, and Ariba.

Market Outlook

We continue to expect solid growth in the technology space in 2012, and we have been surprised by the positive reaction to cautious guidance from companies about 2012 earnings. We expected these lower forecasts to lead to some stock weakness, but investors seem to believe that the worst news is behind them and are buying stocks again. We are still worried about the weakness in Europe flowing into results in the first quarter but think that most estimates can still be exceeded, as monetary stimulus continues and the world economies begin to grow faster. The rebound we expected later in the year seems to be coming earlier, as investors are looking through the soft results from the semiconductor companies and anticipating a recovery in the second half of 2012. There has been continuing good news about the recovery in the US, and the Greek debt situation seems to be resolved for now. We remain cautiously optimistic about 2012.

Past performance is not a reliable indicator of future performance. You should not make any assumptions on the future on the basis of performance information. The value of an investment and the income from it can fall as well as rise as a result of market fluctuations and you may not get back the amount originally invested.

RCM was appointed manager of this Trust on 30th April 2007.

Capital Structure

Total Assets:	£85.7m
Shares in Issue:	22,436,341 (Ordinary 25p) 00 (Subscription 1p)
Ordinary Share Price ¹ :	331.0p
Subscription Share Price ^{1,2} :	52.0p

Subscription Shares

Following the approval of special resolutions at an extraordinary general meeting in August 2007, 4,770,568 RCM Technology Trust Subscription Shares have been listed. Qualifying shareholders received one Subscription Share for every five Ordinary Shares held by them on 17.08.07. These are qualifying investments for stocks and shares ISAs. Each Subscription Share is capable of conversion, on notification to the Company in the thirty days preceding the annual general meeting in any of the years 2008 to 2012 (inclusive), into one Ordinary Share on the date of the relevant annual general meeting. The Conversion Price of the Subscription Shares is 267p, which represents a 10% premium to the Net Asset Value per Share (calculated on an undiluted basis and in accordance with the basis set out in the prospectus dated 18.07.07) as at the close of business on 14.08.07.

Risks & Features

Investment trusts are quoted companies listed on the London Stock Exchange. Their share prices are determined by factors including the balance of supply and demand in the market, which means that the shares may trade below (at a discount to) or above (at a premium to) the underlying net asset value.

Competition among technology companies may result in aggressive pricing of their products and services, which may affect the profitability of the companies in which the Trust invests. In addition, because of the rapid pace of technological development, products or services developed by these companies may become rapidly obsolete or have relatively short product cycles. This may have the effect of making the Trust's returns more volatile than the returns of a fund that does not invest in similarly related companies.

Investment trusts can enhance returns through gearing. This can boost a Trust's returns when investments perform well, though losses can be magnified when investments lose value. This Trust does not currently employ gearing. Derivatives are used to manage the Trust efficiently.
