

## Aim

The Trust's objective is to achieve long-term capital growth by investing principally in the equity securities of quoted technology companies on a worldwide basis with the aim of achieving long-term capital growth.

## Risks & Features

Investment trusts are quoted companies listed on the London Stock Exchange. Their share prices are determined by factors including the balance of supply and demand in the market, which means that the shares may trade below (at a discount to) or above (at a premium to) the underlying net asset value.

Competition among technology companies may result in aggressive pricing of their products and services, which may affect the profitability of the companies in which the Trust invests. In addition, because of the rapid pace of technological development, products or services developed by these companies may become rapidly obsolete or have relatively short product cycles. This may have the effect of making the Trust's returns more volatile than the returns of a fund that does not invest in similarly related companies.

Investment trusts can enhance returns through gearing. This can boost a Trust's returns when investments perform well, though losses can be magnified when investments lose value. This Trust does not currently employ gearing. Derivatives are used to manage the Trust efficiently.

## History

The Trust was launched in December 1995 as a way for investors to gain exposure to quoted technology companies on a worldwide basis with the aim of achieving long-term capital growth. The Board appointed RCM to manage the trust's assets from April 2007. The decision was based on the performance of RCM's US-based technology team, their experience and RCM's depth of expertise in the management of investment trusts.

## Fund Manager's Review

Walter Price

The RCM Technology Trust NAV was down 4.81% for the month, underperforming its benchmark, the Dow Jones World Technology Index, which fell 2.12% during the period. As the month began, there was a strong rally in technology stocks as concern about the Greek default lessened. However, as the month continued, there was a change in the character of the market that hurt our performance. In particular, investors worried more about the impact of the deficit debate on the US economy, and they retreated to many of the large benchmark names.

For example, Apple was up 16.3% for the month (in US\$ terms), while IBM was up 6%. Microsoft was up 5.4% for the month. Google was up 19%, while Cisco was up 3% for the month. These five stocks contributed 3.2% to the Dow Jones World Technology Index, and were 28% of the index at the start of month. We were underweight five of the large benchmark stocks as we believe, with the exception of Apple and Google, over the longer term the potential for growth is slower than their smaller counterparts.

We started the process of de-risking the portfolio about six months ago, however we didn't do enough of it. We expect this process to continue for the next month or so. At the same time, we believe valuations are not high, and that many of the secular changes in technology are just getting started. We still think technology stocks could do well in the year ahead, as a slow economy favors many technology trends that reduce costs, increase revenues, and improve productivity.

## How to Invest?

The Trust is a UK public limited company traded openly on the stock market. You can purchase shares through a stock broker.

RIC: RTT      SEDOL: 0339072      ISIN: GB0003390720

Shares in the Trust can be held within an ISA and/or savings scheme and a number of providers offer this facility. A list of suppliers is available on our website [www.rcm.com/investmenttrusts](http://www.rcm.com/investmenttrusts) or from the AIC at [www.theaic.co.uk](http://www.theaic.co.uk)

Please note: Our Investment Trust Savings Plan was closed and transferred to Alliance Trust Savings on 29 February 2008. Alliance Trust can be contacted on 01382 573 737 or [contact@alliancetrust.co.uk](mailto:contact@alliancetrust.co.uk)

## RCM Advantage

RCM and its predecessors have been managing investment trusts since 1889, providing investors with access to investment markets around the world through professionally managed portfolios. Each trust benefits from the expertise of the RCM fund managers yet, as a company listed on the London Stock Exchange, it is independent and is overseen by its own Board of Directors.

RCM is the global equity specialist within Allianz Global Investors. With offices strategically located in the US, Europe and Asia, RCM uses its global research platform to search out investment opportunities.

Standardised past performance figures comply with the Financial Services Authority's regulations to enable investors to compare different products from different providers.

Past performance is not a reliable indicator of future performance. You should not make any assumptions on the future on the basis of performance information. The value of an investment and the income from it can fall as well as rise as a result of market fluctuations and you may not get back the amount originally invested.

**RCM were appointed managers of this Trust on 30th April 2007.**

## Subscription Shares

Following the approval of special resolutions at an extraordinary general meeting in August 2007, 4,770,568 RCM Technology Trust Subscription Shares have been listed. Qualifying shareholders received one Subscription Share for every five Ordinary Shares held by them on 17.08.07. These are qualifying investments for stocks and shares ISAs. Each Subscription Share is capable of conversion, on notification to the Company in the thirty days preceding the annual general meeting in any of the years 2008 to 2012 (inclusive), into one Ordinary Share on the date of the relevant annual general meeting. The Conversion Price of the Subscription Shares will be 267p, which represented a 10% premium to the Net Asset Value per Share (calculated on an undiluted basis and in accordance with the basis set out in the prospectus dated 18.07.07) as at the close of business on 14.08.07.
