

## Aim

The Trust's objective is to achieve long-term capital growth by investing principally in the equity securities of quoted technology companies on a worldwide basis with the aim of achieving long-term capital growth.

## Risks & Features

Investment trusts are quoted companies listed on the London Stock Exchange. Their share prices are determined by factors including demand, or lack of, which means that the shares may trade below (at a discount to) or above (at a premium to) the underlying net asset value.

Competition among technology companies may result in aggressive pricing of their products and services, which may affect the profitability of the companies in which the Trust invests. In addition, because of the rapid pace of technological development, products or services developed by these companies may become rapidly obsolete or have relatively short product cycles. This may have the effect of making the Trust's returns more volatile than the returns of a fund that does not invest in similarly related companies.

Investment trusts can enhance returns through gearing. This can boost a Trust's returns when investments perform well, though losses can be magnified when investments lose value. This Trust does not currently employ gearing.

## History

The Trust was launched in December 1995 as a way for investors to gain exposure to quoted technology companies on a worldwide basis with the aim of achieving long-term capital growth. The Board appointed RCM to manage the trust's assets from April 2007. The decision was based on the performance of RCM's US-based technology team, their experience and RCM's depth of expertise in the management of investment trusts.

## Fund Manager's Review

Walter Price

For the month of May, technology stocks continued to perform well, however, the effect of currency with the dollar depreciation resulted in the portfolio's NAV and benchmark posting negative returns for the month. Holdings in mid cap growth stocks such as Data Domain, F5 Networks, and Riverbed Technology performed well during the month and positively contributed to both relative and absolute portfolio returns: Data Domain appreciated sharply as it was subject to a takeover battle between EMC and Network Appliance. Additionally, the Fund's holdings in Chinese technology names such as Netease.com, Tencent, and Baidu posted strong returns on a relative and absolute basis as the recovery in China began to evidence itself in reported growth numbers.

On the flipside, companies such as Monsanto and Salesforce.com detracted from returns over the month as they continued to report slower business due to the continuing effects of the recession. However, we increased the portfolio's position in Monsanto on this weakness since we believe the recovery should begin to evidence itself initially in higher growth companies such as this one. Our stock selection within energy and software as well as our overweight allocation to materials detracted from returns during May.

<sup>3</sup>A trust's net asset value (NAV) is calculated as available shareholders' funds divided by the number of shares in issue, with shareholders' funds taken to be the net value of all the company's assets after deducting liabilities. An undiluted, cum-income NAV is shown.

## (Cont.)

We continue to believe that the weak dollar will provide a tailwind for many of our holdings by improving the attractiveness of their products, and expect a gradual economic recovery to begin in the U.S. and North America by the fourth quarter of 2009.

## RCM Advantage

RCM and its predecessors have been managing investment trusts since 1889, providing investors with access to investment markets around the world through professionally managed portfolios. Each trust benefits from the expertise of the RCM fund managers yet, as a company listed on the London Stock Exchange, it is independent and is overseen by its own Board of Directors.

RCM is the global equity specialist within Allianz Global Investors. With offices strategically located in the US, Europe and Asia, RCM uses its global research platform to search out investment opportunities.

Standardised past performance figures comply with the Financial Services Authority's regulations to enable investors to compare different products from different providers.

Past performance is not a reliable indicator of future performance. You should not make any assumptions on the future on the basis of performance information. The value of an investment and the income from it can fall as well as rise as a result of market fluctuations and you may not get back the amount originally invested.

**RCM were appointed managers of this Trust on 30th April 2007.**

## Subscription Shares

Following the approval of special resolutions at an extraordinary general meeting in August 2007, 4,770,568 RCM Technology Trust Subscription Shares have been listed. Qualifying shareholders received one Subscription Share for every five Ordinary Shares held by them on 17.08.07. These are qualifying investments for stocks and shares ISAs. Each Subscription Share is capable of conversion, on notification to the Company in the thirty days preceding the annual general meeting in any of the years 2008 to 2012 (inclusive), into one Ordinary Share on the date of the relevant annual general meeting. The Conversion Price of the Subscription Shares will be 267p, which represented a 10% premium to the Net Asset Value per Share (calculated on an undiluted basis and in accordance with the basis set out in the prospectus dated 18.07.07) as at the close of business on 14.08.07.
