

Aim

The Trust's objective is to achieve long-term capital growth by investing principally in the equity securities of quoted technology companies on a worldwide basis with the aim of achieving long-term capital growth.

Risks & Features

Investment trusts are quoted companies listed on the London Stock Exchange. Their share prices are determined by factors including demand, or lack of, which means that the shares may trade below (at a discount to) or above (at a premium to) the underlying net asset value.

Competition among technology companies may result in aggressive pricing of their products and services, which may affect the profitability of the companies in which the Trust invests. In addition, because of the rapid pace of technological development, products or services developed by these companies may become rapidly obsolete or have relatively short product cycles. This may have the effect of making the Trust's returns more volatile than the returns of a fund that does not invest in similarly related companies.

History

The Trust was launched in December 1995 as a way for investors to gain exposure to quoted technology companies on a worldwide basis with the aim of achieving long-term capital growth. The Board appointed RCM to manage the trust's assets from April 2007. The decision was based on the performance of RCM's US-based technology team, their experience and RCM's depth of expertise in the management of investment trusts.

Fund Manager's Review

Walter Price

The month of December saw the continued recovery in technology stocks which began in late November. The Trust benefited as many of our larger positions had double digit gains for the month, including Oracle, Riverbed, McAfee, Netease, and Taiwan Semiconductor. We reduced our cash to lower levels in late November after the market weakness for the following reasons: our belief that business levels were extremely depressed and earnings expectations had been dramatically reduced for the December quarter. Though we do not expect a rapid recovery, we believe many companies are in a position to at least meet these lowered expectations.

Some of our stocks continued to struggle with weak consumer demand, particularly Apple and the video game companies, but this has been partially offset by our holding in Nintendo, which exceeded expectations during the holiday season. Monsanto was also a weak stock as commodity price weakness caused worries about the spending outlook in 2009.

As we enter 2009, we have tried to position the portfolio with a cost-saving theme. We believe that as spending resumes on technology projects products that help to reduce costs will be the first to be purchased. We are not anticipating a strong rebound in spending or the world economy in 2009 so we think buyers will increasingly turn to technology to help restore margins and generate cash. We are also enthusiastic about companies that will benefit from the infrastructure spending of the new US administration, particularly in energy saving and alternative energy.

How to Invest?

The Trust is a UK public limited company traded openly on the stock market. You can purchase shares through a stock broker.

RIC: RTT **SEDOL:** 0339072 **ISIN:** GB0003390720

Shares in the Trust can be held within an ISA and/or savings scheme and a number of providers offer this facility. A list of suppliers is available from the AIC at www.theaic.co.uk

Please note: Our Investment Trust Savings Plan was closed and transferred to Alliance Trust Savings on 29 February 2008. Alliance Trust can be contacted on 01382 573 737 or contact@alliancetrust.co.uk

RCM Advantage

RCM and its predecessors have been managing investment trusts since 1889, providing investors with access to investment markets around the world through professionally managed portfolios. Each trust benefits from the expertise of the RCM fund managers yet, as a company listed on the London Stock Exchange, it is independent and is overseen by its own Board of Directors.

RCM is the global equity specialist within Allianz Global Investors. With offices strategically located in the US, Europe and Asia, RCM uses its global research platform to search out investment opportunities.

Standardised past performance figures comply with the Financial Services Authority's regulations to enable investors to compare different products from different providers.

Past performance is not a reliable indicator of future performance. You should not make any assumptions on the future on the basis of performance information. The value of an investment and the income from it can fall as well as rise as a result of market fluctuations and you may not get back the amount originally invested.

RCM were appointed managers of this Trust on 30th April 2007.

Subscription Shares

Following the approval of special resolutions at an extraordinary general meeting in August 2007, 4,770,568 RCM Technology Trust Subscription Shares have been listed. Qualifying shareholders received one Subscription Share for every five Ordinary Shares held by them on 17.08.07. These are qualifying investments for stocks and shares ISAs. Each Subscription Share is capable of conversion, on notification to the Company in the thirty days preceding the annual general meeting in any of the years 2008 to 2012 (inclusive), into one Ordinary Share on the date of the relevant annual general meeting. The Conversion Price of the Subscription Shares will be 267p, which represented a 10% premium to the Net Asset Value per Share (calculated on an undiluted basis and in accordance with the basis set out in the prospectus dated 18.07.07) as at the close of business on 14.08.07.
