

Aim

The Trust's objective is to achieve long-term capital growth by investing principally in the equity securities of quoted technology companies on a worldwide basis with the aim of achieving long-term capital growth.

Risks & Features

Investment trusts are quoted companies listed on the London Stock Exchange. Their share prices are determined by factors including the balance of supply and demand in the market, which means that the shares may trade below (at a discount to) or above (at a premium to) the underlying net asset value.

Competition among technology companies may result in aggressive pricing of their products and services, which may affect the profitability of the companies in which the Trust invests. In addition, because of the rapid pace of technological development, products or services developed by these companies may become rapidly obsolete or have relatively short product cycles. This may have the effect of making the Trust's returns more volatile than the returns of a fund that does not invest in similarly related companies.

Investment trusts can enhance returns through gearing. This can boost a Trust's returns when investments perform well, though losses can be magnified when investments lose value. This Trust does not currently employ gearing.

History

The Trust was launched in December 1995 as a way for investors to gain exposure to quoted technology companies on a worldwide basis with the aim of achieving long-term capital growth. The Board appointed RCM to manage the trust's assets from April 2007. The decision was based on the performance of RCM's US-based technology team, their experience and RCM's depth of expertise in the management of investment trusts.

Fund Manager's Review

Walter Price

RCM Technology Trust NAV rose 2.77% (capital only) in March outperforming its benchmark, the DJM W. Tech TR Index which returned -0.63%. Strong stock selection drove relative returns during the month with notable strength in the internet and software industries whereas semiconductors had negative contribution during the month.

There were two big issues this month: civil unrest in the Middle-East and the earthquake/tsunami in Japan. The latter had a larger impact on the technology sector as a significant portion of the technology supply chain runs through Japanese channels. Local markets in Japan declined dramatically and many semiconductor stocks were hit as investors worried about their customers' ability to obtain critical components. We have one top holding in Japan, Hitachi, and we have used the big decline in its stock price to increase our position. The restructuring and cost cutting program of the company will continue, and we think the infrastructure products they sell will be in high demand for the next several years in Japan. As to the supply disruptions, Hitachi, along with most other electronics vendors are certainly to be impacted by the tragic events over the past month. However, we are confident that these industry leading companies will strengthen supply channels and develop solutions to overcome the headwinds. Meanwhile, we do believe the disaster represents a near-term disruption. Supply disruptions are much less concerning than changes in market demand-and we remain confident in the demand side of the equation. On the positive side, we had a rebound in our Chinese holdings, Baidu and Sina, as well as in Netflix, which has been a quite controversial stock over the past year. We remain constructive on Netflix as the company allows content owners to monetise features that are typically not delivered through DVD or cable television. Studios have very few options to charge for old media which is no longer attractive through the mainstream outlets, whose business revolves around new release movies and current season television programming. The Netflix business model fills a unique niche in that it serves as a recommendation engine allowing viewers to find and watch content that was not offered as a latest release in the traditional schedule. As a testament to the importance of Netflix,

it continues to sign deals with studios for its streaming video over the internet service

We continue to expect solid growth in the technology space in 2011. We worry that expectations for many companies may have grown too high. As a result, we have continued to prune our portfolio of stocks where we think expectations are unrealistic. Going forward, we will be sensitive to valuation and market expectations.

How to Invest?

The Trust is a UK public limited company traded openly on the stock market. You can purchase shares through a stock broker.

RIC: RTT SEDOL: 0339072 ISIN: GB0003390720

Shares in the Trust can be held within an ISA and/or savings scheme and a number of providers offer this facility. A list of suppliers is available on our website www.rcm.com/investmenttrusts or from the AIC at www.theaic.co.uk

Please note: Our Investment Trust Savings Plan was closed and transferred to Alliance Trust Savings on 29 February 2008. Alliance Trust can be contacted on 01382 573 737 or contact@alliancetrust.co.uk

RCM Advantage

RCM and its predecessors have been managing investment trusts since 1889, providing investors with access to investment markets around the world through professionally managed portfolios. Each trust benefits from the expertise of the RCM fund managers yet, as a company listed on the London Stock Exchange, it is independent and is overseen by its own Board of Directors.

RCM is the global equity specialist within Allianz Global Investors. With offices strategically located in the US, Europe and Asia, RCM uses its global research platform to search out investment opportunities.

Standardised past performance figures comply with the Financial Services Authority's regulations to enable investors to compare different products from different providers.

Past performance is not a reliable indicator of future performance. You should not make any assumptions on the future on the basis of performance information. The value of an investment and the income from it can fall as well as rise as a result of market fluctuations and you may not get back the amount originally invested.

RCM were appointed managers of this Trust on 30th April 2007.

Subscription Shares

Following the approval of special resolutions at an extraordinary general meeting in August 2007, 4,770,568 RCM Technology Trust Subscription Shares have been listed. Qualifying shareholders received one Subscription Share for every five Ordinary Shares held by them on 17.08.07. These are qualifying investments for stocks and shares ISAs. Each Subscription Share is capable of conversion, on notification to the Company in the thirty days preceding the annual general meeting in any of the years 2008 to 2012 (inclusive), into one Ordinary Share on the date of the relevant annual general meeting. The Conversion Price of the Subscription Shares will be 267p, which represented a 10% premium to the Net Asset Value per Share (calculated on an undiluted basis and in accordance with the basis set out in the prospectus dated 18.07.07) as at the close of business on 14.08.07.
