

## Aim

The Trust's objective is to achieve long-term capital growth by investing principally in the equity securities of quoted technology companies on a worldwide basis with the aim of achieving long-term capital growth.

## Risks & Features

Investment trusts are quoted companies listed on the London Stock Exchange. Their share prices are determined by factors including the balance of supply and demand in the market, which means that the shares may trade below (at a discount to) or above (at a premium to) the underlying net asset value.

Competition among technology companies may result in aggressive pricing of their products and services, which may affect the profitability of the companies in which the Trust invests. In addition, because of the rapid pace of technological development, products or services developed by these companies may become rapidly obsolete or have relatively short product cycles. This may have the effect of making the Trust's returns more volatile than the returns of a fund that does not invest in similarly related companies.

Investment trusts can enhance returns through gearing. This can boost a Trust's returns when investments perform well, though losses can be magnified when investments lose value. This Trust does not currently employ gearing.

## History

The Trust was launched in December 1995 as a way for investors to gain exposure to quoted technology companies on a worldwide basis with the aim of achieving long-term capital growth. The Board appointed RCM to manage the trust's assets from April 2007. The decision was based on the performance of RCM's US-based technology team, their experience and RCM's depth of expertise in the management of investment trusts.

## Fund Manager's Review

Walter Price

Technology stocks rose during February, with the DJTM technology Index(£) rising by 8.5%. After the end of the calendar year, some investors feared that the strong gains in 2009 were "as good as it gets," and February saw some mixed buying/selling pressure. As the month ended, business reports from China were generally favourable, and consumer spending in the US began to recover.

The Trust's NAV outperformed the benchmark by 0.19%, driven by stock selection. On the positive side, the Trust had good performance from its holdings in the communications sector. The move to consolidate data centers and virtualize servers seems to be leading to an upgrade cycle in communications infrastructure. F5 Networks and Riverbed Technology are both benefitting from this increase in corporate spending. The Trust also had a solid position in Baidu, which surged when Google announced that they might be pulling out of China. Baidu is the leading search engine in China.

Detracting from performance were several companies, including SunPower which declined when the new government of Germany announced that they were seeking lower prices for solar power, the largest market for solar at this time. Another detractor was Microsoft, although the company reported much better than expected results. Again, investors seemed to feel that business was peaking for the company. We disagree, but recognize that the next surge of growth will be in the second half

<sup>3</sup>A trust's net asset value (NAV) is calculated as available shareholders' funds divided by the number of shares in issue, with shareholders' funds taken to be the net value of all the company's assets after deducting liabilities. An undiluted, cum-income NAV is shown.

## (Cont.)

of the year after the new version of Microsoft Office ships.

Over the past few months entering 2010, we have reduced semiconductor exposure and some Chinese stocks, but retain solid positions in those sectors. We believe that technology products offer good returns for companies in 2010 and we expect a nice rebound in spending in 2010.

Please note: Our Investment Trust Savings Plan was closed and transferred to Alliance Trust Savings on 29 February 2008. Alliance Trust can be contacted on 01382 573 737 or [contact@alliancetrust.co.uk](mailto:contact@alliancetrust.co.uk)

## RCM Advantage

RCM and its predecessors have been managing investment trusts since 1889, providing investors with access to investment markets around the world through professionally managed portfolios. Each trust benefits from the expertise of the RCM fund managers yet, as a company listed on the London Stock Exchange, it is independent and is overseen by its own Board of Directors.

RCM is the global equity specialist within Allianz Global Investors. With offices strategically located in the US, Europe and Asia, RCM uses its global research platform to search out investment opportunities.

Standardised past performance figures comply with the Financial Services Authority's regulations to enable investors to compare different products from different providers.

Past performance is not a reliable indicator of future performance. You should not make any assumptions on the future on the basis of performance information. The value of an investment and the income from it can fall as well as rise as a result of market fluctuations and you may not get back the amount originally invested.

**RCM were appointed managers of this Trust on 30th April 2007.**

## Subscription Shares

Following the approval of special resolutions at an extraordinary general meeting in August 2007, 4,770,568 RCM Technology Trust Subscription Shares have been listed. Qualifying shareholders received one Subscription Share for every five Ordinary Shares held by them on 17.08.07. These are qualifying investments for stocks and shares ISAs. Each Subscription Share is capable of conversion, on notification to the Company in the thirty days preceding the annual general meeting in any of the years 2008 to 2012 (inclusive), into one Ordinary Share on the date of the relevant annual general meeting. The Conversion Price of the Subscription Shares will be 267p, which represented a 10% premium to the Net Asset Value per Share (calculated on an undiluted basis and in accordance with the basis set out in the prospectus dated 18.07.07) as at the close of business on 14.08.07.
