Investment trusts are quoted companies listed on the London Stock Exchange. Their share price is determined by factors including demand, or lack of, which means that the shares may trade below (at a discount to) or above (at a premium to) the underlying net asset value. The package value is the value of one Ordinary Share and 1/5th of a Subscription Share.

The Trust may also seek to enhance returns for its shareholders through gearing, in the form of bank borrowings. Gearing can boost the Trust's returns when investments perform well, though losses can be magnified when investments do badly.

\* Source: Lipper as at 30.04.08

\*\* Following the approval of special resolutions at an extraordinary general meeting in August 2007, 4,770,568 RCM Technology Trust Subscription Shares have been listed. Qualifying shareholders received one Subscription Share for every five Ordinary Shares held by them on the 17.08.07. These are qualifying investments stocks and shares ISAs. Each Subscription Share is capable of conversion, on notification to the Company in the thirty days preceding the annual general meeting in any of the years 2008 to 2012 (inclusive), into one Ordinary Share on the date of the relevant annual general meeting. The Conversion Price of the Subscription Shares will be 267p, which represented a 10% premium to the Net Asset Value per Share (calculated on an undiluted basis and in accordance with the basis set out in the prospectus dated 18.07.07) as at the close of business on 14.08.07. The Subscription shares may be traded separately from the Ordinary shares.

### Trust aim & characteristics

The investment objective of the Company is to invest principally in the equity securities of quoted technology companies on a worldwide basis with the aim of achieving long-term capital growth.

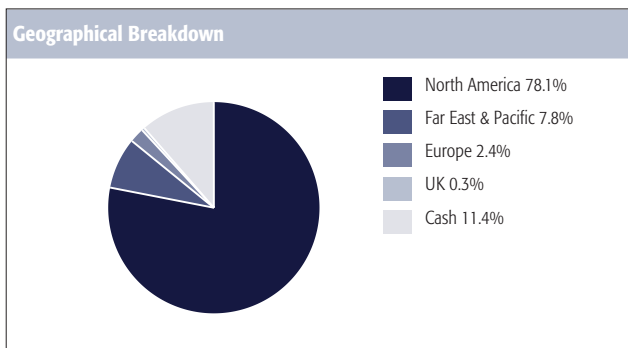

### Fund Manager's Review

Walter Price

The technology sector began to recover in April, with some companies that reported better than expected results in the period such as Google, Baidu, First Solar, and Apple doing well. However, many of our midcap, high growth companies such as Riverbed, McAfee, and MEMC continued to lag the larger stocks as they had some issues in their reports. We think the business of these companies will recover from some of the problems seen in the first quarter, and these stocks will more than catch up in the months ahead. Also, the attempt by Microsoft to buy Yahoo was not good for either stock, and we owned both.

As we wrote last month, we think the worst is behind us for technology stocks, though growth is still challenging and the recession is still rippling through the results of many companies. However, we think stock prices are a leading indicator of business and sentiment and it is encouraging that the markets have recovered.

Source: Allianz Global Investors as at 30.04.08. Competition among technology companies may result in aggressive pricing of their products and services, which may affect the profitability of the companies in which the Trust invests. In addition, because of the rapid pace of technological development, products or services developed by these companies may become rapidly obsolete or have relatively short product cycles. This may have the effect of making the Trust's returns more volatile than the returns of a fund that does not invest in similarly related companies.

## History

The Trust was launched in December 1995 as a way for investors to gain exposure to quoted technology companies on a worldwide basis with the aim of achieving long-term capital growth. The Board appointed RCM to manage the fund's assets from April 2007. The decision was based on the performance of RCM's US-based technology team, their experience and the manager's depth of expertise in the management of investment trusts.

**Launch Date:** December 1995 **Wind-up Date:** None (continuation vote in 2011)

## Share buybacks

The Company has adopted a discount management policy whereby consideration is given to buying back shares, for cancellation and into treasury, at prices representing a discount greater than 7.0% to net asset value per share, if there is demand for it to do so. 343,500 shares have been repurchased for cancellation since RCM assumed management of the Company, and no shares are currently held in treasury.
