

Allianz Technology Trust PLC

Half-Yearly Financial Report
30 June 2019

Allianz 
Global Investors

Key Information

Investment objective

Allianz Technology Trust PLC (the Company) invests principally in the equity securities of quoted technology companies on a worldwide basis with the aim of achieving long-term capital growth in excess of the Dow Jones World Technology Index (sterling adjusted, total return) (the benchmark).

Investment policy

The investment policy of the Company is to invest in a diversified portfolio of companies that use technology in an innovative way to gain a competitive advantage. Particular emphasis is placed on companies that are addressing major growth trends with innovation that replaces existing technology or radically changes products and services and the way in which they are supplied to customers.

What constitutes a technology stock

The investment management team views technology companies as those with revenues primarily generated by the application of technology products and services. This is divided into two areas:

- Traditional telecommunications, media and technology (TMT) segments which include internet, computers and computer peripherals, software, electronic components and systems, communications equipment and services, semiconductors, media and information services.
- Non-traditional tech companies which are those in various other industries that use technology in an innovative way to gain a strategic, competitive edge.

As technology becomes ever more pervasive, it is increasingly difficult to differentiate between technology companies and significant adopters as outlined above. Much is spoken of disruptive technologies – those which will force change within an industry and which may often displace the dominance of incumbent market leaders. The challenge is to understand not only current technologies, but also future trends and the likely effects.

Asset allocation

The Manager does not target specific country or regional weightings and aims to invest in the most attractive technology shares on a global basis. The Manager aims to identify the leading companies in emerging technology growth sub-sectors. The majority of the portfolio will comprise mid and large cap technology shares.

Risk diversification

The Company aims to diversify risk and no holding in the portfolio will comprise more than 15% of the Company's assets at the time of acquisition. The Company aims to diversify the portfolio across a range of technology sub-sectors.

Gearing

In normal market conditions gearing will not exceed 10% of net assets but may increase to 20%. The Company's Articles of Association limit borrowing to one quarter of its called up share capital and reserves. As at 30 June 2019 there was no borrowing facility in place.

Discount Control

The Board will continue to consider buying back shares when the discount is over 7% and all other factors are aligned. The Board considers carefully the parameters which should apply to both the issuance of shares and the buy back of shares from the market and will only proceed when the action is in the best interests of shareholders as a whole.

Liquidity

In normal market conditions the liquidity of the portfolio, that is the proportion of the Company's net assets held in cash or cash equivalents, will not exceed 15% of net assets but may be increased to a maximum of 30%.

Derivatives

The Company may use derivatives for investment purposes within guidelines set down by the Board.

Foreign currency

The Company's current policy is not to hedge foreign currency.

Benchmark

One of the ways in which the Company measures its performance is in relation to its "benchmark", which is an index made up of some of the world's leading technology shares. The benchmark used is the Dow Jones World Technology Index (sterling adjusted, total return). The Company's strategy is to have a concentrated portfolio which is benchmark aware rather than benchmark driven. Therefore, the Company has tended to have a significantly higher than benchmark allocation to high growth, mid cap companies which are considered to be the emerging leaders in the technology sector. The Manager believes that the successful identification of these companies relatively early on in their growth stages, offers the best opportunity for outperformance over the long-term.

Change of year end

The year end changed from 30 November to 31 December in 2018, resulting in the half-year end changing from 31 May to 30 June 2019.

Top 100 Funds

Allianz Technology Trust has been chosen from almost 3,000 eligible actively-managed funds as one of Investors Chronicle 'Top 100 Funds' for six consecutive years. The Company's selection is based on its performance history relative to risk, fees, tenure of manager and consistency of returns.

Investment Company of the Year Awards

The Company won this coveted award in November 2018, having also been victorious in 2017 and 2015. This accolade recognises excellence in closed-ended fund management and highlights consistent performance over time.

Money Observer Rated Funds 2019

The Company has been included in Money Observer's Rated Funds list for 2019. The list recognises funds that have demonstrated consistent outperformance or that have been chosen as ideal routes into specific markets and sectors.

Money Observer Investment Trust Awards 2019

"A worthy winner of our most prestigious sector award", the Company won the Best Large Trust category, in recognition of its consistent high achievement. This accolade is an independent, statistical and qualitative assessment of performance and highlights the Company's outperformance both in its class and against its peers.

Citywire AAA fund manager rating 2019

Citywire is the only firm to exclusively rate managers, not funds. The rating takes account of a three-year performance record and is updated every month. It is entirely quantitative with the analysis being based on the information ratio, a recognised measure of risk-adjusted performance. In order to be rated, a fund manager will need to beat his or her benchmark over a three-year period.

Interim Management Report

Dear Shareholder

Impressive outperformance as global markets defy expectations

Following a robust period to 31 December 2018 in which the Company outperformed against an uncertain geopolitical and economic backdrop, I am delighted to report that your Manager has delivered a strong performance over the first half of the current financial year up to 30 June 2019. In a period of continuing uncertainty, but where global equities were on a firmer footing overall, the Company's performance has been impressive - in both absolute and comparative terms. The Company's net asset value (NAV) increased by 27.3%, beating its benchmark, the Dow Jones World Technology Index (sterling adjusted, total return), which rose by 22.9%. Over the same period the FTSE All-Share Index rose by 13.0%.

The direction of travel for global equity markets has been broadly positive over the period, in defiance of simmering geopolitical friction, mixed economic news flow and a marked slowdown in global economic growth. In particular, the trade tensions between the US and China have continued to cast their shadow, with evidence that the dispute is starting to have a real impact on the economy. Both the US and China imposed higher 'tit for tat' tariffs on each other's exports during the review period and the issue remains unresolved at the time of writing. The dispute has the potential to deliver a negative impact on global economic growth as well as significant implications for US companies doing business in China.

Technology stocks moved higher over the period, generally outperforming the broader global equity market. Your Company's performance was particularly good, boosted by careful stock selection. The Company's performance is explored in more detail in the Investment Manager's Review on pages 7 to 10.

Over the period, the Company's share price increased by 34.9% from 1220p as at 31 December 2018 to 1646p as at 30 June 2019, moving from a discount to NAV of 5% to a modest premium. Strong investment performance, combined with the share issuance programme described below, resulted in Shareholders' funds at the end of the period reaching £559.4 million, an increase of £129.3 million since the year end.

Given the nature of the Company's investments and its stated investment objective to achieve capital growth, no dividend is proposed in respect of the current period and the Board considers it unlikely that any dividend will be declared in the near future.

Growing the Company

The Board is committed to issuing new shares whenever market conditions are conducive in order to grow the Company for the benefit of shareholders. This strategy has been implemented successfully over recent years. However, share issuance paused in the latter part of 2018 which was a turbulent period for the technology sector and global equity markets in general. No shares were issued from early November 2018 to mid-March 2019. However, since then market conditions have improved, increasing demand for the Company's shares. This demand is primarily coming from private investors choosing to buy shares through execution-only investment platforms. An example of this is the Interactive Investor platform where the Company was the third most bought investment trust in the 2018/2019 tax year.

The Company's shares started the period trading at a discount of 5% to the underlying NAV, but have subsequently tended to trade at a small premium, ending the period at a premium of 0.6% to NAV. The Board pays close attention to changes in the discount/premium at which the Company's shares trade compared to its NAV. It considers carefully the parameters and processes that should apply to ensure that any buy-back or issuance of shares is both in the interests of existing shareholders and properly controlled. The Board considers the absolute level of discount or premium and how this compares to other comparable investment companies and general market conditions.

Interim Management Report *(continued)*

Within the reporting period the Company responded to increased demand by issuing a total of 725,000 new shares, at an average premium to NAV of 1.05%, for a total of £11.6 million. At the date of writing, a further 430,000 ordinary shares have been issued since 30th June 2019, bringing the share capital of the Company to 34,632,168 Ordinary shares.

The Board will continue to consider the issuance of new shares subject to its criteria being met, as outlined above. Shares will only be issued at a premium to NAV and if the Board is satisfied that the issuance is in the best interests of existing shareholders.

Performance Fee

As reported above the Company has significantly outperformed its benchmark. Subject to the detailed conditions of the investment management agreement the Manager is eligible to receive 12.5% of such outperformance and hence a performance fee accrual of £3.7 million has been made as at 30 June 2019. The performance fee actually payable will be based on any outperformance for the full year to 31 December 2019 and could therefore differ significantly from the amount currently accrued.

A worthy winner: further awards recognition

In previous reports I have been pleased to highlight the numerous awards received by the Company over recent years. Such recognition is highly valued as it acknowledges the Company's achievement in long term investment performance, raises awareness of the Company's specialist investment remit and can ultimately help create sustained demand for its shares. I am therefore very pleased to advise you that as well as being an Investors Chronicle 'Top 100 Fund' for six consecutive years, the Company is also the current holder of the Investment Week Investment Company of the Year Award, Specialist category; the Company has won this award in three of the last four years, reflecting its impressive track record.

In April, the Company was also awarded 'Best Large Trust' in the Money Observer Investment Trust Awards 2019. Money Observer noted that the Company had achieved the highest returns of all this year's award-winners (performance measured over three years to 31 January 2019), calling it "a worthy winner of our most prestigious sector award". This accolade is an independent, statistical and qualitative assessment of the Company's performance and highlights the outperformance both in its class and against its peers.

Material events and transactions

On 17th May 2019, the Company moved depository from Bank of New York Mellon (International) Limited to HSBC Bank Plc. Apart from the Annual General Meeting of the Company held on 22 May 2019 at which all resolutions put to Shareholders were passed, there were no material events or transactions relating to the Company to report in the six-month period to 30 June 2019.

Retirement of Richard Holway and new Board appointment

Following our initial announcement in April, I now confirm that Richard Holway will be stepping down from the Board on 31 December 2019 in accordance with the Board's agreed succession plan. I and my fellow board members would like to thank Richard for the excellent contribution and particularly the wealth of relevant experience that he has brought to the Company and the Board over the past 12 years. We wish Richard all the best for the future.

Following Richard's decision, the Company commenced the process of identifying and appointing a new Director and I am very pleased to advise you that we have today separately announced that Neeta Patel will be joining the Board on 1 September 2019. Full details of Neeta's relevant qualifications and experience are contained in that announcement.

Interim Management Report *(continued)*

Outlook

When I last wrote to shareholders in March, I commented on the Company's robust performance, referencing both the positive return delivered by the Manager and the outperformance – by some margin – of its benchmark. However, I noted that broader markets were continuing their unpredictable trajectory and that weakening global growth could make the remainder of 2019 challenging for investors. With these factors in mind, the Board is delighted with these latest figures that demonstrate the Company's continued strong performance at the halfway stage of its financial year.

The Company is investing in a buoyant sector with strong long term secular growth characteristics but is well aware that all sectoral performance also tends to be cyclical. We acknowledge, once again, that there remains the possibility of a correction for the technology sector at some stage in the future, even though it has continued to defy predictions. However, we are reassured by the Manager's proven expertise in carefully choosing a portfolio of technology stocks across a range of technology subsectors and finding excellent investment opportunities among more attractively valued areas of the sector.

Principal risks and uncertainties for the remainder of the financial year

Other than as noted above, the principal risks and uncertainties facing the Company are broadly unchanged from those described in the Annual Financial Report for the period ended 31 December 2018. These are set out in the Strategic Report on pages 58-62 of that Report, together with commentary on the Board's approach to mitigating the risks and uncertainties, under the following Risk headings: Investment Strategy; Technology Sector; Cyber; Market; Currency; Financial and Liquidity; and Operational. In addition to the principal risks, the Company faces the risks associated with the provision of services by third parties and general business risks including accounting, legal and regulatory matters.

The Board performs a high-level review of the principal risks at every meeting to ensure that the risk assessment is current and relevant, adjusting mitigating factors and procedures as appropriate.

Access to the latest investment insights

As part of our communications programme to existing and potential investors the Company distributes monthly factsheets, regular insight pieces and other occasional Company updates to all those who opt in to receive them. Subscribers also receive notifications of the latest Manager podcasts and video content. If you would enjoy receiving these targeted communications you can sign up easily via the Company's home page at www.allianztechnologytrust.com.

Going concern

The Directors believe that it is appropriate to continue to adopt the going concern basis in preparing the financial statements as the assets of the Company consist mainly of securities that are readily realisable and the Company's assets are significantly greater than its liabilities. Accordingly, the Company has adequate financial resources to continue in operational existence for the foreseeable future. The Company is subject to a continuation vote of the shareholders every five years; the last continuation vote was put to shareholders and passed at the AGM held in 2016.

Interim Management Report *(continued)*

Related party transactions

In accordance with the definition as provided by the Listing Rules 11.1.4, the only related party arrangement in place is the relationship between the Directors and the Company. The services provided by the Investment Manager under the Investment Management Agreement form a significant contract but are not deemed to be a related party transaction. There have been no material transactions which have affected the financial position of the Company other than fees paid to directors in the normal course of business.

Responsibility statement

The Directors confirm to the best of their knowledge that:

- the condensed set of financial statements contained within the half-yearly financial report has been prepared in accordance with FRS 102 and FRS 104, as set out in Note 1 and the Accounting Standards Board's Statement: 'Half-Yearly Financial Reports';
- the interim management report includes a fair review of the information required by Disclosure and Transparency Rule 4.2.7 R, of important events that have occurred during the first six months of the financial year, their impact on the condensed set of financial statements, and a description of the principal risks and uncertainties for the remaining six months of the financial year; and
- the interim management report includes a fair review of the information concerning related party transactions as required by Disclosure and Transparency Rule 4.2.8 R.

The half-yearly financial report was approved by the Board on 5 August 2019 and signed on its behalf by the Chairman.

Robert Jeens
Chairman
5 August 2019

Investment Manager's Review

Global equities rallied strongly over the first half of 2019, with many markets delivering double-digit gains. The year started off on a strong footing, with stocks rebounding from the steep sell-off seen at the end of 2018 as sentiment was boosted by hopes of improved trade relations between the US and China and monetary policy U-turns from key central banks. Equity markets ratcheted higher until May when global stocks suffered a sharp set-back as the breakdown of US/China trade talks led to a series of 'tit-for-tat' tariffs and other protectionist measures. Central banks came to the rescue in June, issuing a series of dovish comments which caused stocks to rally once more and countered concerns over heightened geopolitical risks in the Middle East. At a sector level, technology stocks were the strongest performers, while the health care sector was the weakest, albeit still delivering robust gains.

Technology stocks outperformed the broader index over the period. While global semiconductor and hardware stocks delivered solid gains in the period, both segments lagged behind the technology sector due to the ongoing trade tensions between the US and China. Supply chains and end markets are highly connected between the two countries,

making the impact more acute for these groups. Software and services stocks held up better given lower exposures to China trade uncertainties and earnings reports that largely supported the view of stable and healthy growth.

During the period, we added exposure to internet software & services, software, and semiconductor companies. However, we reduced exposure to some hardware and diversified financials companies. We believe that spending in cloud computing and software as a service is rapidly growing, and this trend is likely to persist as the movement to cloud computing accelerates. As valuations in semiconductors became more attractive after the 2018 sell-off, we added to the semiconductor companies with exposure to attractive growth themes (i.e. electric vehicles, artificial intelligence, and cloud computing). We reduced exposure to hardware companies given the group's exposure to the ongoing trade dispute between the US and China. Lastly, we reduced positions in diversified financials companies such as MasterCard and Visa after strong rallies in both stocks. We see more attractive risk-reward profiles in other areas of the portfolio.

Investment Manager's Review *(continued)*

Top Contributors and Detractors

The Allianz Technology Trust outperformed the Dow Jones World Technology Index (sterling adjusted, total return) by 4.4 percentage points and the FTSE All-Share Index by 14.3 percentage points during the period. The portfolio's outperformance has been boosted by companies benefiting from significant secular growth themes as well as strong operational performance. Stock selection has been the most significant driver of relative performance:

- The portfolio's outperformance in 2019 has been driven mostly by smaller high-growth companies.
- Okta, Zscaler, Paycom Software, MongoDB, and Twilio were among the top contributors to relative returns. All of these companies continue to deliver strong execution, benefiting from increasing demand for innovative software solutions.
- Within semiconductors and equipment, overweight positions in Cree and Teradyne and not owning Intel have also helped the portfolio's performance.

At the holdings level, our position in Okta was a top contributor as it delivered strong quarterly results with robust revenue growth. Okta is a data security provider offering services such as automated user management, integration, mobile identification, multifactor authentication, and reporting software. Okta has a compelling opportunity to disrupt the large market for identity and access management. With a large number of applications and over 5,000 customers, Okta is beginning to see a network effect developing. The company also benefits from the shift to the cloud as customers looking for an identity management solution for cloud applications are attracted to the wide range of applications. Management noted that subscription revenue was driven by the company's acceleration with enterprise customers. The world's largest organizations are increasingly realising that identity security is essential to their cloud, digital transformation, and security initiatives. We maintain our positive view of the company given its growing market opportunity, strong execution, and new product launches that should further advance Okta's leadership in identity security.

Access management specialist Okta was a top contributor, delivering strong quarterly results and robust revenue growth.

Investment Manager's Review *(continued)*

Our position in cloud security company Zscaler was another top contributor due to strong sales growth and free cash flow generation. The company operates as a security-as-a-service company, offering a cloud-based security platform. The platform provides web and mobile security, threat protection, cloud application visibility, and cloud-enabled networking solutions. Customers are increasingly adopting Zscaler's products, which provide a single platform to enforce business and security policy for their users to access multiple applications and services. Our conviction in Zscaler remains high as the company has a significant growth opportunity and compelling competitive advantages with its unique capabilities in cloud security. Additionally, customers are seeing a quick return on their investment, which is a very strong selling point for Zscaler relative to competitors.

Other top active contributors included our overweight positions in Paycom Software and AVEVA Group, as well as an underweight position in Alphabet (Google).

Our underweight position in Microsoft was the top detractor from relative performance. Shares outperformed the technology sector following very strong quarterly results driven by broad-based strength in its cloud business. We are seeing an inflection of demand from enterprise customers as more companies move their workloads to the cloud. Microsoft should continue to benefit from this shift over time given their strong long-term relationships with enterprise customers. At the current pace of growth, it is likely that Microsoft's cloud business alone could become one of the largest technology platforms in the world. Microsoft has been investing in data centres and developing partnerships to boost sales of its main cloud products, which appear to be paying off for the company. We believe Microsoft's push toward more innovative products and services should drive strong long-term sales and profit growth. While Microsoft is now the largest holding in the portfolio, we are underweight relative to the benchmark's large position in the stock. Our exposure to the cloud and artificial intelligence themes is spread across multiple companies in the portfolio, as we believe this approach offers a more attractive risk/reward profile.

Cloud security company Zscaler provides fast and secure network connections irrespective of an employee's location or where their applications reside.

Investment Manager's Review *(continued)*

Not owning Apple, one of the largest holdings in the benchmark, was also a top detractor from relative performance. After falling sharply in late 2018, shares outperformed in the first half of 2019. Some investors are optimistic that Apple's large installed base of iPhone users will boost future iPhone upgrades as well as monetisation of services. However, we expect to see a lull in the 2019 iPhone product cycle ahead of the 5G iPhones in 2020. Furthermore, we are seeing lower demand from Chinese consumers, partly due to the US-China trade dispute. Both issues could limit iPhone upgrades and services revenue growth more than current expectations. While the benefits of Apple's balance sheet flexibility are priced into the stock, we see limited upside potential. As a result, we are not currently invested in this stock.

Other active detractors included an overweight position in Tesla, as well as underweight positions in Facebook and Qualcomm.

Outlook

In our view, the technology sector continues to benefit from strong tailwinds which should continue to drive attractive long term appreciation. The digital transformation is the top priority for many companies across the economy, as these technologies are increasingly becoming critical drivers of growth, productivity, and competitive positioning. If IT budgets must be cut in an economic slowdown, management teams are reporting that the budget for the digital transformation will be the last to be reduced. This transition is a multi-year process, and we believe we are still in the fairly early stages. For the semiconductors and hardware segments, we expect the environment to remain mixed as companies work through production and inventory adjustments amid the trade conflict between the US and China. From a fundamental perspective, these companies are much stronger after years of consolidation, and we expect growth to reaccelerate in 2020. We maintain exposure to companies that we believe will benefit from secular growth themes. Despite periods of volatility driven by geopolitical uncertainty, we expect the broad technology sector to see attractive growth in the future.

We continue to believe the technology sector can provide some of the best absolute and relative return opportunities in the equity markets – especially for bottom-up stock pickers. The growth in technology is coming from the creation of new markets, rather than simply GDP growth.

Investors need to find companies generating organic growth by creating new markets or effecting significant change on old markets. Industries such as automobiles, advertising, security, retail, and manufacturing are all being shaped and transformed by advances in technology. We are seeing an ongoing wave of innovation in the sector that we believe has the potential to produce attractive returns for companies with best-in-class solutions.

Despite high valuations for some high growth companies, we continue to see massive addressable markets much larger than the revenue today. However, we have consolidated our exposure to these areas in select companies having the most compelling solutions and whose business models demonstrate a discernible path to deliver strong earnings and cash flow growth over the next few years.

We are also finding excellent investment opportunities among more attractively valued areas of technology. In particular, certain technology incumbents are making compelling progress on their "as-a-service" offerings. Artificial Intelligence (AI) is also becoming a significant trend. From consumer goods, such as the Amazon Echo, to autonomous driving, practical applications of AI are emerging. We expect AI will increasingly be used to make our lives more convenient.

Finally, we will carefully balance risks and opportunities going forward, leveraging our industry expertise, and emphasising individual stock selection.

Notes

Note 1 – Summary statement of accounting policies and basis of preparation

The condensed set of financial statements have been prepared in accordance with FRS 102 'Interim Financial Reporting' (FRS 104) issued by the FRC in March 2015 and the revised Statement of Recommended Practice - 'Financial Statements of Investment Trust Companies and Venture Capital Trusts' (SORP) issued by the Association of Investment Companies (AIC) in November 2014, as updated in February 2018.

The accounting policies applied for the condensed set of financial statements with regard to measurement and classification have not changed from those set out on the Company's annual report for the 13 month period ended 31 December 2018.

The total column of the Income Statement is the profit and loss account of the Company. All revenue and capital items derive from continuing operations. No operations were acquired or discontinued in the period. A Statement of Total Recognised Gains and Losses is not required as all gains and losses of the Company have been reflected in the Income Statement.

Note 2 – Management

Allianz Global Investors GmbH, UK Branch is the appointed Investment Manager and as such is entitled to a base fee of 0.8% per annum payable quarterly in arrears and calculated on the average value of the market capitalisation of the Company at the last business day of each month in the relevant quarter. The base fee reduces to 0.6% for any market capitalisation that exceeds £400m. Additionally there is a fixed fee of £55,000 per annum.

The Investment Manager is also entitled to a performance fee calculated at 12.5% of the outperformance of the Company's adjusted net asset value ('NAV') per share total return as compared to the benchmark, the Dow Jones World Technology Index (sterling adjusted, total Return). Such amount is applied to the year end NAV and adjusted for the weighted average number of Ordinary Shares in issue during the Performance Period. Any performance fee payable is capped at a maximum of 2.25% of the Company's NAV at the year end, and any underperformance brought forward from previous years is taken into account in the calculation of the performance fee payable. A performance fee will only be paid if the Company's NAV is higher than at which any previous performance fee was paid and if performance in that year was also ahead of the benchmark on a cumulative basis. At 30 June 2019 £3,662,000 was accrued for the performance fee. The quantum of any performance fee payable will be based on the Company's NAV at 31 December 2019 and may differ significantly from any sum accrued before such date. Performance fees when paid are charged 100% to capital.

Note 3 – Earnings per Ordinary Share

The earnings per Ordinary Share is based on the net profit for the half year of £117,648,000 (31 May 2018: net profit of £61,944,000, 31 December 2018: net profit of £21,054,000) and on the weighted average number of Ordinary Shares in issue during the period of 33,710,057 (31 May 2018: 27,660,692, 31 December 2018: 30,241,003).

Note 4 – Valuation of Investments

Investments are designated as held at fair value through profit or loss in accordance with FRS 102 sections 11 and 12. Investments are initially recognised at Fair Value, which is determined to be their cost. Subsequently, investments are revalued at Fair Value, which is the bid market price for listed investments.

FRS 102 sets out three fair value hierarchy levels for disclosure.

Notes *(continued)*

Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.

Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly.

Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability.

As at 30 June 2019, the financial assets at fair value through profit or loss of £543,567,000 (31 December 2018: £407,902,000) are categorised as follows:

	As at 30 June 2019 £'000s	As at 31 December 2018 £'000s
Level 1	543,567	407,902
Level 2	-	-
Level 3	-	-
	543,567	407,902

Note 5 – Called up Share Capital

At 30 June 2019 there were 34,202,168 Ordinary Shares in issue (31 May 2018: 29,627,880; 31 December 2018: 33,477,168). During the half-year ended 30th June 2019 the Company bought back no Ordinary Shares for holding in treasury (half-year ended 31 May 2018: nil; and 13 month period ended 31 December 2018: nil). During the same period the Company issued nil shares into the market from the Ordinary Shares held in treasury, (half-year ended 31 May 2018: 1,708,453 shares; 13 month period ended 31 December 2018: 1,708,453 shares). The Company issued a further 725,000 Ordinary shares, from the authorised block listing facility, during the period. The proceeds from the total number of shares issued amounted to £11,631,000 (half-year ended 31 May 2018: £38,525,000; and 13 month period ended 31 December 2018: £95,586,000).

Since 30 June 2019, 430,000 shares were issued..

Note 6 – Investments

Purchases for the half-year ended 30 June 2019 were £297,169,000 (31 May 2018: £175,617,000) and sales were £245,968,000 (31 May 2018: £112,751,000).

Note 7 – Transaction costs

Brokers commission costs on equity purchases for the half-year ended 30 June 2019 amounted to £131,000 (31 May 2018: £78,000) and sales were £93,000 (31 May 2018: £104,000).

Note 8 – Comparative Information

The half yearly financial report to 30 June 2019 and the comparative information to 31 May 2018 have neither been audited nor reviewed by the Company's auditors and do not constitute statutory accounts as defined in section 434 of the Companies Act 2006 for the respective periods. The financial information for the 13 month period ended 31 December 2018 has been extracted from the statutory accounts for that period which have been delivered to the Registrar of Companies. The auditor's report on those financial statements was unqualified and did not contain a statement under Section 498 (2) or (3) of the Companies Act 2006.

Glossary of UK GAAP Performance Measures and Alternative Performance Measures

UK GAAP performance measures

Net Asset Value is the value of total assets less all liabilities, by dividing this amount by the total number of ordinary shares in issue.

Earnings per ordinary share is the profit after taxation, divided by the weighted average number of shares in issue for the period.

Alternative Performance Measures (APMs)

Discount/Premium is the amount by which the stock market price per ordinary share is lower/higher than the Net Asset Value, or NAV, per ordinary share. The discount/premium is normally expressed as a percentage of the NAV per ordinary share.

Ongoing charges are operating expenses, excluding one off costs, incurred in the running of the company, whether charged to revenue or capital, but excluding financing costs and performance fees. These are expressed as a percentage of the average net asset value during the year and this is calculated in accordance with guidance issued by the Association of Investment Companies.

Net Asset Value (or NAV)

The Net Asset Value of the Ordinary Shares is calculated and announced daily and the top ten holdings are announced monthly. They are published on the London Stock Exchange Regulatory News Service. They are also available from Allianz Global Investors, via Investor Services on 0800 389 4696 or on the Company's website: www.allianztechnologytrust.com

How to Invest

Shareholders can invest in Allianz Technology Trust by purchasing shares through an investment platform operated by a third party provider, a stockbroker or a financial adviser. Many online platforms allow share dealing in 'real time' and some offer an option to invest regularly each month as well as lump sum investing. Competition between platform providers is keen so charges are usually very competitive. More information is available from Allianz Global Investors either via Investor Services on 0800 389 4696 or see 'How to invest' on our website, www.allianztechnologytrust.com where there are links to a range of these platforms, many of which allow the holding of shares within an ISA, Junior ISA, SIPP and/or savings scheme.

Shareholders' Enquiries

Link Asset Services are the Company's registrars and maintain the share register. In the event of queries regarding their holdings of shares, lost certificates, registered name and address details, etc., shareholders should contact the registrars on +44 (0)371 664 0300. Lines are open 9.00 a.m. to 5.00 p.m. (London time) Monday to Friday. Calls may be recorded and monitored randomly for security and training purposes.

Any general enquiries about the Company should be directed to the Company Secretary, Allianz Technology Trust PLC, 199 Bishopsgate, London EC2M 3TY.
Telephone: +44 (0)20 3246 7405.
