

Aim

The Trust's objective is to achieve long-term capital growth by investing principally in the equity securities of quoted technology companies on a worldwide basis with the aim of achieving long-term capital growth.

Risks & Features

Investment trusts are quoted companies listed on the London Stock Exchange. Their share prices are determined by factors including the balance of supply and demand in the market, which means that the shares may trade below (at a discount to) or above (at a premium to) the underlying net asset value.

Competition among technology companies may result in aggressive pricing of their products and services, which may affect the profitability of the companies in which the Trust invests. In addition, because of the rapid pace of technological development, products or services developed by these companies may become rapidly obsolete or have relatively short product cycles. This may have the effect of making the Trust's returns more volatile than the returns of a fund that does not invest in similarly related companies.

Investment trusts can enhance returns through gearing. This can boost a Trust's returns when investments perform well, though losses can be magnified when investments lose value. This Trust does not currently employ gearing.

History

The Trust was launched in December 1995 as a way for investors to gain exposure to quoted technology companies on a worldwide basis with the aim of achieving long-term capital growth. The Board appointed RCM to manage the trust's assets from April 2007. The decision was based on the performance of RCM's US-based technology team, their experience and RCM's depth of expertise in the management of investment trusts.

Fund Manager's Review

Walter Price

Performance for the technology sector was strong in March, continuing the upturn that began in mid-February. The Trust (+7.76%) slightly outperformed the DJM World Tech Index (GBP) for the month. During this period, the market gravitated toward small and mid cap technology companies. We have a significant part of our portfolio in this segment, in fact more than the benchmark, but several of the sectors within that category did not participate in this surge. For example, the cellular tower sector was flat for the month, and several of our Chinese software stocks such as Longtop Financial declined. In addition, our large positions in Microsoft and Hewlett Packard increased significantly less than the benchmark.

We are increasing our positions in the higher growth midcap names as those companies seem to be accelerating back to the high growth rates seen before the recession. Since most models and valuation targets assume a slower trajectory, we think there is opportunity in these stocks. We are trying to be careful with our valuation targets, and we are assuming that stock appreciation this year comes from earnings growth and not from valuation increases. Where we don't see this acceleration in performance, we are using those stocks as sources of funds for the faster growing companies.

Several themes in technology are leading the market this year. We are actively

pursuing opportunities in LED lighting, internet commerce, communications infrastructure spending, internet TV reaching the mainstream market, and both positive and negative influences of the Apple iPad and iPhone. Many of these topics reflect longer duration themes that will shape the technology landscape. We are hopeful that they will help our portfolio outperform in the modest economic growth environment we foresee.

Please note: Our Investment Trust Savings Plan was closed and transferred to Alliance Trust Savings on 29 February 2008. Alliance Trust can be contacted on 01382 573 737 or contact@alliancetrust.co.uk

RCM Advantage

RCM and its predecessors have been managing investment trusts since 1889, providing investors with access to investment markets around the world through professionally managed portfolios. Each trust benefits from the expertise of the RCM fund managers yet, as a company listed on the London Stock Exchange, it is independent and is overseen by its own Board of Directors.

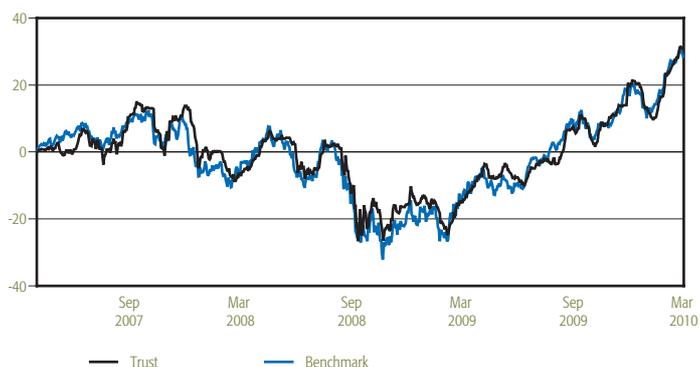

RCM is the global equity specialist within Allianz Global Investors. With offices strategically located in the US, Europe and Asia, RCM uses its global research platform to search out investment opportunities.

Standardised past performance figures comply with the Financial Services Authority's regulations to enable investors to compare different products from different providers.

Past performance is not a reliable indicator of future performance. You should not make any assumptions on the future on the basis of performance information. The value of an investment and the income from it can fall as well as rise as a result of market fluctuations and you may not get back the amount originally invested.

RCM were appointed managers of this Trust on 30th April 2007.

Subscription Shares

Following the approval of special resolutions at an extraordinary general meeting in August 2007, 4,770,568 RCM Technology Trust Subscription Shares have been listed. Qualifying shareholders received one Subscription Share for every five Ordinary Shares held by them on 17.08.07. These are qualifying investments for stocks and shares ISAs. Each Subscription Share is capable of conversion, on notification to the Company in the thirty days preceding the annual general meeting in any of the years 2008 to 2012 (inclusive), into one Ordinary Share on the date of the relevant annual general meeting. The Conversion Price of the Subscription Shares will be 267p, which represented a 10% premium to the Net Asset Value per Share (calculated on an undiluted basis and in accordance with the basis set out in the prospectus dated 18.07.07) as at the close of business on 14.08.07.
